

Preserving Historic Buildings One Window at a Time

Our 3250 Series Steel Replica Windows are capable of withstanding up to 200 mph hurricane winds. Winco's Steel Replica Window Series are hurricane-impact tested to meet a variety of standards:

- Meets AAMA AW-PG120 criteria
- Large missile impact tested HVHZ (TAS Protocols) / ASTM E1886/E1996 wind zone 4, D -Missile (9 lb 2x4 @ 50 ft/s)
- Hurricane cycled at +/- 90 psf
- Blast resistance tested per ASTM F1642 and AAMA 510

This means Winco's Steel Replica Windows are Large Missile Impact Certified and AW rated performance for ASTM E331 and E547 water tests at a 12 psf pressure differential, making them the ideal choice for historic buildings near coastal waters anywhere in the U.S.

If you have an historic project on the boards, contact a Winco rep to help preserve the historic charm and meet strict design requirements.
